

Please don't do anything to lessen Indiana's Telephone Privacy law protections. The difference before and after implementation of this law protection is like night and day. I would receive calls several times a week. Now I don't receive any. I expected the calls to decrease; however, I didn't expect them to totally stop. That is exactly what has happened--the calls have totally stopped with Indiana's Telephone Privacy law protections. Please don't do anything to change this.
